

To whomever it may concern,

As a citizen, and most importantly a human being, I strongly urge you not to repeal the prohibitions placed on media companies. This does not challenge our nation or society, but rather it reduces the ideas and possibilities of different talents from a diverse group of peoples down to one perspective. One perspective is never enough. That is the main reason injustices happen in this world. People fail to look at situations from more than one angle. People are wronged and misinformed when they only have one (most often biased) way to look and interpret the world. That can never be good for a society, a nation, or a species. Please consider the consequences these actions of repealing the cross-ownership ban will have on a society of people who are already failing to see things from anymore than one perspective. After all, if a person could view the world through another's eyes, would we be at war right now? Thank you very much for taking the time to listen to another person's point of view.
